

Steel floor welding system

The task:

The steel floors must be welded with end pieces on scaffolding. An automatic process from stacking individual pieces to bundling the finished pieces is required.

The conntronic solution:

Medium frequency technology. A round, 30m long special welding system with medium frequency welding technology. The unfinished parts are automatically isolated with a range of MF welding guns on carriages. The welding spots are fixed and finally the finished product is automatically stacked and strapped.

Technical data of the system:

Space requirements WxDxH:	29500x18000x5500 mm
System cycle time:	17 s

We develop a fitting solution for your individual requirements. Challenge us.
