

ct-LaserCell with remote scanner head on robot

The task:

Various components for the automotive industry have to be efficiently manufactured using laser welding for small batch sizes.

The conntronic solution:

A compact laser cell, transportable using a forklift truck, with robot, rotary tilting table and remote scanner laser head.
The units can be quickly retooled, simple online programming of the weld seams is possible.

Technical data of the system:

Space required WxDxH: 6000x2500x3300 mm
System cycle time: depends on product

We develop a fitting solution for your individual requirements. Challenge us.

Solutions for welding machines design

ct-services

- + Customer orientated engineering for economical production processes
- + Product and component development
- + Service
